App features:

Exercise planning features

- Calendar showing training history
- Calendar showing planned exercise set
- Push notifications for training day/time
- Training goal
- Burndown chart
- Exercise set creation
- Exercise customization
- Push notifications customization
- Information storage in the cloud

Exercising features

- Exercise list
- Timer / stopwatch for resting / time-based exercises
- Manual count for set-based exercises
- Automatic count for set-based exercises

Exercises:

Default exercises

- Warm up (default: 2min)
- Indoor exercises:
 - Squats (default: 20)
 - Push ups (default: 10)
 - Walking lunges (default: 20)
 - Dumbbell rows (default: 10)
 - Plank (default: 15s)
 - Jumping jacks (default: 30)
 - Rest (default: 1min)
- Stretch (default: 3min)
- Outdoor exercises:
 - Time running (default: 30min)
 - Distance running (default: 2km)

The app doesn't need to discriminate indoor and outdoor activities

Exercises rules

- A set of the same exercise cannot be done in consecutive days
- All sets must start with Warm up and end with Stretch
- Example of exercising set:
 - Warm up
 - 3 exercise sets containing the indoor exercises (rest included)
 - Stretch

- Example of goal:
 - 9 sets of indoor exercises (rest not included)
 - A goal is just a set of exercises with high load and no need of warming up and stretching

App pages:

Home Page

- Burndown chat
- Readonly calendar showing exercises and goal
- Random funny motivation quote
- Planning button
 - suggested text: My planning
 - action: navigates to planning page
